

To whom it may concern

Marsden Weighing Machine Group

Marsden Weighing Machine Group has supplied the Wellbeing Centre's at Microsoft with body composition analysers for 10 years. They are constantly used by our nursing staff to assist with our 'Health Assessments' (we have an annual maintenance contract for all our machines)

They also support us in our 'Health Promotion' work by attending any Health Fairs we organise, by bringing the latest equipment along to demonstrate. We have also organised two very successful Pedometer challenge events, with all the pedometers being supplied by 'Tanita'

We feel, we work in partnership with Marsden Weighing Machine Group to offer the best medical weighing equipment. They are always professional, knowledgeable, reliable and very supportive, delivering the highest standard of service.

We look forward to continuing a working relationship with them.

Regards

Dr Philip Unwin
