MARSDEN
PRECISION WEIGHING SOLUTIONS

I-610-SS - AAW-SSS
Waterproof Weighing Indicator

- Durable stainless steel housing
- Waterproof design for demanding environments
- Large 36mm LCD display
- HI / LO / OK checkweighing functionality
- Hold and parts counting functions
- Dual serial communication ports
- RS232 and Bluetooth connectivity
- Suitable for industrial and commercial weighing applications

Built for demanding environments

Designed for industrial environments, the I-610-SS features a durable stainless steel housing that provides protection against moisture and demanding working conditions.

Its waterproof construction makes it suitable for applications where hygiene, reliability and regular cleaning are essential, including food processing and industrial production.

Simple and efficient operation

The large 36mm LCD display provides clear weight readings, while intuitive functions including checkweighing, hold and parts counting support efficient day-to-day weighing tasks.

HI / LO / OK functionality allows operators to quickly identify whether products fall within specified weight limits, helping improve consistency and productivity.

Flexible connectivity and integration

With RS232 and Bluetooth connectivity, the I-610-SS provides flexible options for connecting to compatible external devices and supporting efficient data transfer.

An optional printer allows operators to produce printed weighing records, while the rechargeable battery pack and power adaptor offer flexibility for different working environments.

Dsiplay:	36mm LCD	Optional extras:	Printer
Housing:	Stainless steel	Connectivity:	RS232 / Bluetooth
Protection:	Waterproof design	Power Supply:	Mains or battery
Dimensions:	268mm × 140mm × 57mm	Operating Temp:	-10˚C to +40˚C
Functions:	Checkweighing, Hold, Parts Counting	Warranty Period:	1 years
