Jadever JWI-700C Parts Counting Indicator

- 1/30,000 display resolution
- High impact ABS housing
- 3-in-1 LCD displays with bright LED backlight
- Simplifies Counting Process
- Adjustable resolutions and parameters
- Hi/lo alarm

Jadever JWI-700C:

Parts Counting Indicator

- 1/30,000 display resolution
- High impact ABS housing
- 3-in-1 LCD displays with bright LED backlight
- Simplifies counting process
- Adjustable resolutions and parameters
- Hi/lo alarm
- Durable keypad
- Auto power-off
- Optional RS-232
- Works with optional printer

Hi/Lo alarm

A hi/lo alarm makes counting quicker and easier. It means you can count to specific targets, with the alarm sounding if you hit a target quantity, or exceed a target quantity.

This can help improve efficiency and speed, especially if you are using the scale regularly and need to count out a specific number of identical items or carrying out an internal stock take.

Data management

To make bulk parts counting and inventory control even easier, the JWI indicator can be purchased with a printer, which allows you can print a label each time you count.

Alternatively, an additional U-Key can be purchased which enables data transfer between the scale and a computer, for seamless and quick sharing of data, ideal for fast paced environments.

Counting

The JWI indicator makes bulk parts counting easy. Three bright, backlit LCD displays show total weight, unit weight and total count clearly.

This means you can count items quickly and easily - whether your JWI indicator is connected to a high capacity platform scale or a high accuracy bench scale. There can also be a second scale input.

Dimensions:	270mm x 105mm x 165mm	Power Supply:	Mains (optional rechargeable battery)
Display Resolution:	1/30000	Approvals:	N/a
Functions:	Tare/Pre-set Tare, Zero, and Counting	Warranty Period:	1 Year
