Simple weighing

The M-510 is a premium stand on scale, made from reinforced aluminium, which is ideal for weighing adults as it is accurate to a minimum of 100g.

The scale has proven to be a best-seller at Marsden over the years since we first brought this product to market and that is due to the simplicity of the scale and the easy to use functions.

Remote display as standard

The M-510 comes with a remote display fitted as standard. This means that when you are operating the scale in sensitive environments, the weight reading is discreet for only the user to see.

The remote display also means that the user does not have to bend down and see the weight reading on the display, as it is easy to see on the device.

Easy to use

The M-510 uses our popular DP-3810 indicator, which features a full numeric keypad, easy to use functions and a clear display.

The On/Off button ensures that you have full control over the device. Hold enables you to gain weights even for the most active babies and the tare keys allows you deduct the weight of the sling or any clothing.
