M-999 Patient Transfer Scale

- Queen's Award for Enterprise: Innovation winner
- Class III and MDR approved
- 250kg capacity & 500g graduations
- Accurately weighs immobile patients during lateral transfer
- Replaces the traditional PAT slide as part of the existing transfer process
- Reduces door-to-needle time
- Tested in over 30 hospitals
- Used by over 70% of NHS trusts
- Hold and auto power-off functions
- Quick and easy to use
- 8-year warranty

Trusted by NHS professionals

The M-999 was invented by RGN Gillian Taylor, drawing on over 20 years of experience and the need for an accurate way to weigh immobile patients.

Accurate weight is essential for nutrition, monitoring and diagnosis, as well as ensuring weight-dependent medications are administered correctly.

Simple to operate

The M-999 was developed using feedback from over 30 NHS Trusts, resulting in a Patient Transfer Scale that is simple to use while providing accurate weight measurements.

The PTS is now used in over 70% of NHS Trusts across the UK. Weighing a patient takes just minutes and removes the need to 'guesstimate' their weight and reduces door-to-needle time.

Award-winning innovation

The Patient Transfer Scale was recognised with the Queen's Award for Enterprise in the Innovation category, celebrating its innovative approach to patient weighing.

This prestigious recognition highlights Marsden's commitment to developing innovative weighing solutions for healthcare.

Capacity:	250kg	Weight:	11kg
Graduations:	500g	Power Supply:	Internal rechargeable battery
Functions:	Hold, Tare, Portable	Battery LIfe:	50 hours of continuous use
Dimensions:	1800mm × 700mm × 30mm	Optional Extras:	Carry Case
Approvals:	Class III & MDR Approved	Warranty Period:	8 years
