

Performance Fit Smart Scale

- 8-electrode body composition analysis
- Dual-frequency BIA technology
- Whole-body and segmental analysis
- Displays seven key results on the scale
- Weight, Body Fat, BMI, Body Water, Muscle Mass, Visceral Fat, Bone Mass
- Bluetooth app connectivity
- Supports multiple user profiles

Detailed body composition insight

Using eight hand and foot electrodes, the scale measures the arms, legs and torso to provide a more complete picture of body composition.

Whole-body and segmental measurements help users understand changes in body fat, muscle mass, body water and other key fitness indicators.

Simple to operate

The large LED display presents seven key measurements directly on the scale, including weight, BMI, body fat, body water, muscle mass, bone mass and visceral fat.

The stable platform and handheld electrode bar support a straightforward measurement process.

Track progress through the app

Bluetooth connectivity allows results to be transferred to the Feel Fit app, where users can access additional measurements, review previous results and monitor progress over time.

Multiple profiles make the scale suitable for households, personal trainers and shared fitness environments.

Capacity:	180kg	Weight:	1.844kg
Graduations:	0.05kg	Power Supply:	Battery
Measurements:	Weight, BMI, Visceral Fat, Body Fat	Connectivity:	Bluetooth
Dimensions:	310mm × 336mm × 33.8mm	Warranty Period:	1 year
