Marsden MG-4800:

Hand grip dynamometer

The Marsden MG-4800 is suitable for a wide range of applications from rehabilitation to health assessments.

Accuracy with every use

The MG-4800 is designed to help rehabilitation of people with disabilities or injuries by enabling them to develop strength of the hand and forearms. The MG-4800 will assist with a gradual build of the muscles and grip providing the user with the opportunity to regain critical abilities and skills.

Ideal for rehabilitation doctors

Provides average readings for each hand

Comfortable hand grip

Easy to use buttons

Quick and easy to use

This dynamometer is quick and easy to use, simply install the battery and then you are ready to get started.

With many modes on the dynamometer it can measure the maximum grip force out of a whole number of attempts. It can also calculate the average reading given throughout all the force readings.

Built to last

Like the rest of the items in the Marsden range, the MG-4800 is built to last. It comes with a full two year warranty, and for extra peace of mind it can be backed by a full service contract.

Accuracy Assured
