Marsden UF-1200-I-400-NA: A flexible solution to heavy duty weighing

Sometimes, weighing everything in one location just isn't possible. That's where a u-frame comes in. These **tough mild steel units** can be placed anywhere in your premises, and thanks to a bold, bright and clear 32mm high LED display, weight readings can be seen in almost any lighting conditions.

Ultimate portability - guaranteed accuracy

UF-1200-I-400-NA Pallets Scales are chosen by warehouses and factories for their **value for money, flexibility and the little space they take up**. **Wheels and a handle** are fitted meaning you can **use the scale anywhere** in your premises. **Four loadcells** mean you're still getting the accuracy of an equivalent platform scale.

Get a weight reading - in seconds

Thanks to the **quick connectors** the UF-1200-I-400-NA's frame and indicator can be set up for weighing in no time. Place the frame on the ground where you need to weigh, and then add your load. Right up to **two tonnes**, the indicator will give you an accurate weight reading of your goods in **32mm high bright red digits**. That's thanks to a **display resolution of 1/30,000**. Don't want the reading in **metric**? Just switch the display to **lb readings**. Weighing several pallets for one shipment? The UF-1200-I-400-NA will automatically **add up the individual weights** when you select the **Accumulation** function.

Designed for use with pallet trucks

At 90mm, the height of the u-frame is **perfectly suited to pallet trucks**. The forks of your pallet truck will slide between the forks of your u-frame neatly - meaning no fuss, just quick and easy weighing.

Key features

- Mild steel construction
- Handle and wheels for portability
- Designed for use with euro pallets
- Tare
- Hold
- Accumulation
- Counting mode
- Unit switchable
- Four heavy duty load cells
- Large, 32mm high bright red LED display
- Programmable auto power-off/screensaver
- Mains powered or rechargeable battery
- Wall bracket for indicator

Easy access functions

The UF-1200-I-400's indicator is packed with easy to use features. **Tare** will allow you to remove the weight of a pallet or crate from the reading. **Hold** will stabilise the weight reading even if your load is moving around. The buttons are simply laid out, cleanly and clearly. Battery power lasts up to 50 hours.
