Marsden MSS-JWI: A parts counting scale purpose built for accurate inventory control

The Marsden MSS-JWI is a **tough parts counting scale** that makes laborious counting processes quick, easy and accurate.

There is no longer any need for operatives to count by hand. The MSS-JWI does it all - whether you're weighing small bolts for stock takes or large boxes for despatch.

Fast and convenient counting

Three bright, clear LCD screens on the Jadever JWI indicator mean this scale will speed up counting processes instantly. The screens show **unit weight, total weight and total count** as you add items to the scale.

A **hi/lo alarm** allows you to easily count to a set target number easily, with the alarm sounding when you hit the target count.

A range of capacities and base sizes

So you can get a counting scale that meets your exact needs, a **range of base sizes is available**.

You can also choose from **capacity options ranging from 3kg to 60kg**. Remember, the lower the capacity the more precise the graduations, and therefore the more likely the scale is to notice minute differences between items being counted.

Take the scale anywhere

An optional **internal rechargeable battery** means you can use the MSS-JWI anywhere regardless of where the nearest socket is. An adaptor is supplied for charging the scale, and there is an **auto power-off function** to save battery power.

The JWI indicator, and the **tough mild steel base**, are both light enough to be carried by hand around your warehouse or factory.

Key features

- 3-in-1 display
- Easy to use functions
- Zero
- Tare/Preset Tare
- Bright LCD display with LED backlight
- Optional rechargeable battery
- Adaptor supplied
- ABS housing (indicator)
- Mild steel construction (base)
- Hi/lo alarm
- Auto power-off
- Adjustable levelling feet

Built to last in a tough environment

The JWI indicator features ABS casing, and the base is a strengthened mild steel frame with platter fitted on top, which can be removed for cleaning. For peace of mind we recommend taking out an annual Marsden service contract to keep your MSS-JWI as accurate as possible.

Specification

Capacities/graduations: 3kg-60kg; 0.2g-20g
Base size: 300mm x 300mm, 400mm x 400mm,
600mm x 600mm
Power: Mains
