Marsden DT-JWI: For easy, accurate bulk parts counting and inventory control

Counting large quantities of identical items, whether it's for quality control, order picking or inventory checks, is prone to human error.

For ultimate accuracy, choose a professional counting scale, and for high accuracy bulk counting tasks, save time and improve processes with the **Marsden DT-JWI Parts Counting Drive Thru Platform Scale**.

An easy to use indicator for accurate parts counting

The DT-JWI consists of a mild steel **drive thru platform with a high accuracy parts counting indicator**.

The JWI indicator makes bulk parts counting easy. Three **bright, backlit LCD displays** show total weight, unit weight and total count clearly. This means you can count items quickly and easily - and with **capacities upto 1500kg available**, you can **count multiple identical items in an instant**.

Simply add items to the scale to get a total count. A **hi/lo alarm** means you can count to specific targets, with the alarm sounding if you hit a target quantity, or exceed a target quantity. Therefore, **counting processes are even faster** and **accuracy is greater**.

Speed up counting processes when you're using pallet trucks

Our drive thru scales are designed to speed up weighing processes, as goods can be easily rolled onto them using a pallet truck. The platform and ramps are **low profile** to make placing a load on the scale as easy as possible.

Our drive thru scales are suitable for **almost any size of load, upto a maximum of 2 tonnes**.

The drive thru has a **tough anti-slip durbar surface**, and it's built to last years.

Keep records with printers and PC connectivity available

To make bulk parts counting and inventory control even easier, the DT-JWI can be purchased with a **printer**. With this attached, you can **print a label each time you count a shipment of items**.

Alternatively, a **USB cable** is available which allows you to **instantly record the data in a spreadsheet on a PC**. Press Print, and weight and count data will populate your spreadsheet. This means you can **record everything you count on the scale**, easily and accurately.

Key features

- Mild steel low profile drive thru platform
- Easy to use counting indicator
- Choice of capacities, graduations and sizes
- 3-in-1 LCD displays with LED backlight
- High impact ABS housing on indicator
- Hi/Lo alarm
- Tare/Preset Tare
- Automatic counting accuracy improvement
- Optional printers and Scale To PC USB leads
- Optional rechargeable battery

Reliable parts counting, year after year

For extra peace of mind, **Marsden service contracts** are available keep your scale accurate year after year.

Recalibration can be carried out, and a Calibration Certificate supplied. Contact Marsden for more details.

Specification

Capacities: 600kg or 1500kg

Graduations: 0.2kg or 0.5kg

Dimensions: 1200mm x 1200mm x 55mm;
1500mm x 1500mm x 55mm

Power: Mains (rechargeable battery optional)
