Marsden M-565: Professional, high accuracy weighing for slimming groups and gyms

If you need a **high accuracy, long lasting** weighing scale designed specifically for gyms, personal trainers and slimming groups, choose the M-565.

With its 250kg capacity, the M-565 is suitable for **almost any user** - and its remote indicator makes it **ideal for weight sensitive environments**.

High accuracy for results you can trust

The M-565 is **accurate to 200g**, right up to a maximum **capacity of 250kg**. This means you can see even small changes in a person's weight from week to week!

Weight readings are displayed on the indicator's **large, bright 30mm LCD display**. A separate indicator makes the scale **suitable for weight sensitive environments**.

Weight readings can be displayed in **kg/g or st/lb**.

Easy access features to save time

The indicator for the scale is a **brand new design**; the **display is larger** than previous models and features are **easily accessible**. Fewer buttons pressed means less time spent weighing.

A feature **unique to Marsden** is the **BSA calculator** - meaning, along with the M-565's BMI function, you can get a true picture of a patient's body health.

Hold stabilises the weight on the screen. **Tare** will remove unwanted weight, like clothing.

Take your scale anywhere

The indicator is **small and compact** - and the base of the scale has an **integrated carry handle**.

Additionally, there is a **carry case** available, making the M-565 the ultimate portable slimming scale.

Key features

- Weighs in kg/g or st/lb
- Mains operated or batteries
- Large, bright display
- Battery status indicator
- Micro USB port
- BMI
- BSA
- Hold/Tare
- Robust platform
- Adjustable levelling feet
- Optional carry case

USB port for recording weight data

The M-565 has a **micro USB port**. This means that, once configured, **weight information can be sent from the scale to a spreadsheet or database**.

Since software will need to be configured to receive the data from the scale, if you intend to use the M-565 to record weight data, please contact us.

Specification
