Marsden B-250: An easy to use, accurate and versatile scale

The Marsden B-250 Bench Scale is built for weighing packets, parcels and boxes - up to 300kg. It features a splashproof platter, is easy to use and is highly accurate. The scale has a hygienic, easy to wipe down platter. At an affordable price, it is perfect for freight depots, post rooms and catering outlets.

Simple functions for instant, high accuracy weight readings

The B-250 bench scale keeps things simple - with a bright display and just five function buttons. Place your item or items on the stainless steel, wipe-down weighing pan. Use the Tare function to remove unwanted weight, like a box. It's also unit switchable, so you can weigh in pounds or kilograms. The option of a Tare pedal makes using this feature even easier. Weight readings are as accurate as to the nearest 2g.

Take it anywhere you need

The B-250 is powered by batteries so can be used wherever it's required. 4x AA batteries provide a minimum 40 hours' continuous use. An AC adaptor is also supplied so the scale can be powered from the mains if required. Plus, after time without use, the scale will automatically power off to save battery life.

Magnetic indicator for convenient weight reading positioning

The intuitive indicator has a crystal-clear LCD screen, giving efficient measurements instantly. Plus, the indicator is magnetic so it can be mounted to a metal surface at eye level, therefore the readings on the LCD display will be displayed in the most convenient position for you.

Key features

- Clear LCD display
- Tare
- Wipe down platter
- Battery or mains powered
- Unit switchable
