- High precision weighing

## Wipe down

The Tanita 1458SS-310 is an IP65 rated weighing scale, which means that the device is splashproof and it can be wiped down regularly in order to keep it clean.

The scales IP rating denotes the level of protection against water and dust. The first digit refers to protection from dust and the second second digit shows the scales protection against liquids.

## Easy to use

The 1458SS keeps weighing items and ingredients simple and easy - with a large, bright display and just three function buttons.

Use the Tare function to remove unwanted weight, like a plate or container. The scale will show the weight to the nearest 1g, minus the weight of the container which you have deduced using Tare..

## Portable

An internal rechargeable battery provides at least 300 hours of continuous use, which offers you great flexibility and longevity for a full shift.

The scale has an auto power off feature so it will turn off if not in use, to help preserve battery life. The 1458SS-310 is also compact, so taking it to where you need it is no problem.
