

MARSDEN

DC-400 High Accuracy Counting Scale

- Wide range of capacities and graduations
- RS-232 fitted as standard
- Tare function to remove unwanted weight
- Stainless steel top pan
- Backlit LCD display
- Covered by 1 year warranty

Marsden DC-400:

High Accuracy Counting Scale with Printer

- Wide range of capacities and graduations
- Printer fitted as standard
- RS-232 fitted as standard
- Tare function to remove unwanted weight
- Stainless steel top pan
- Bright red LED display
- Zero function
- Accumulation mode
- Hi/Lo check weighing
- Covered by 1 year warranty

What is the DC-400?

The DC-400 is a sophisticated and highly accurate counting scale. It features a range of useful functions including an inbuilt printer for label printing.

Not only does the scale feature from an inbuilt printer, it also has an RS-232 port as standard, which enables data transfer and connectivity to a second scale input. Ideal for warehouses, factories and depots.

Easy to use

The DC-400 has 13,000 PLUs - so if you count literally thousands of different types of products, you can store item names and piece weight in the scales memory.

You can also use the scale to create (and print) barcodes for each of the 13,000 PLUs; then, plug in a barcode scanner and instantly recall a products PLU when its barcode is scanned.

Print and record your results

One of the key benefits of the DC-400 is the ability to print a record of each counting process, thanks to the inbuilt thermal label printer.

The labels which are printed will contain count and weight information, and because the scale is thermal there is no need to replace messy ink cartridges. There is also an auto cutter.

Capacity:	5kg, 25kg	Power Supply:	Mains
Graduations:	0.1g, 0.2, 0.5g, 1g, 2g, 5g	Approvals:	Non-Approved
Functions:	Tare, Portable, Accumulation, Hi Lo Alarm	Warranty Period:	1 Year
Dimensions:	150mm x 162mm (5kg), 290mm x 215mm (25kg)	Weight of Scale:	5kg
