- Adjustable levelling feet
- Zero function
- Accumulation mode
- Hi/Lo check weighing
- Covered by 1 year warranty

What is the DC-788?

The DC-788 is a counting scale and a check weigher, with enhanced software for easier and more flexible parts counting. Featuring accumulation, tare and hi/lo alarm.

The counting scale has an RS-232 output fitted as standard and can be connected to a second scale. It's the perfect scale for more accurate and faster parts counting processes.

Robust counting

The DC-788 is a tough counting scale, suitable for demanding environments where regular, high accuracy counting tasks are carried out.

It has a durable shell and a water-resistant keypad, which makes this scale perfect for many environments and for many uses. The bright red LED display shows the weight brightly and clearly.

Choice of capacities

The DC-788 has a choice of capacities and graduations available to help meet your needs. Capacities ranging from 0.5kg to 50kg and graduations as low as 0.02g.

The Tare function means that any unwanted weight such as the weight of a container which is holding individual parts, can be removed easily and quickly from the overall weight reading.

Capacity:	500g, 1kg, 2.5kg, 5kg, 10kg, 25kg, 50kg	Power Supply:	Mains
Graduations:	0.02g, 0.05g, 0.1g, 0.2g, 0.5g, 1g, 2g	Approvals:	Non-Approved
