Digi DI-166SS :

Stainless Steel Indicator

- 1/4,000 display resolution
- Large LCD backlit display
- Trade Approved indicator
- Stainless steel housing
- IP67 splashproof indicator
- Easy to use
- 40 hours of continuous use
- Simple function keys
- Use with platforms, bench scales and more
- Animal weighing mode

Waterproof

The DI-166SS is IP67-rated, which makes it suitable for tough industrial environments where it needs to be regularly washed down to keep it hygienic.

The IP rating also means that the indicator is suitable for use in a wide range of environments including with food produce or in situations where the scale may become wet, i.e., fish mongers.

Highly compatible

The DI-166SS indicator can be used with a wide variety of scale bases that we carry within our range, from small bench scales to the largest of platforms.

This means that a wide range of weighing variations are available with this indicator, regardless of if you want a small scale to weigh parts or a large scale to weigh cattle, you can benefit from the DI-166SS.

Easy to use

The DI-166SS is packed with features, including digital Tare, which allows the user to remove any unwanted weight from the total, such as the weight of a pallet.

The large benefit of the DI-166SS is that it has animal weighing mode. This helps to capture accurate weights for animals, regardless of movement and help you to obtain a stable weight readings.
