- Trade Approved indicator
- 200 programmable PLUs
- RS-232 output and USB port
- Numerical keyboard
- Large LCD display
- Hi/lo alarm
- Built-in clock
- Mains powered
- Super size LCD display with backlight

### Trade Approved

The DI-620P is a Trade Approved indicator, meaning that you can meet legal requirements when buying or selling goods based on weight

Rigorous testing ensures the scale delivers repeatable weight readings and the customer receives value for money with a high quality indicator which is suitable for use in a number of applications.

### Streamline your process

The indicator has 200 programmable PLUs, which enables easy access to stored weight readings. These can be updated via the USB port.

The hi/lo alarm will alert you when a load is over the required weight, under, or if it's the exact weight it needs to be. The indicator also has a simple counting function which can help when loading vehicles.

### Easy to use

The DI-166SS includes one touch/digital Tare subtraction to remove any unwanted weight, such as the weight of a pallet or a container.

Plus, the DI-620 has an RS-232 output and a USB port to help the user export the weight data from the scale and input it into an existing system like an Excel spreadsheet to store the readings.

Dimensions:	275mm x 120mm x 195mm	Power Supply:	Mains
Number of PLUs:	200	Approvals:	Trade Approved
Functions:	Tare/pre-set tare, Zero, and Counting	Warranty Period:	1 Year
