- Easy to use
- Lightweight
- Large easy to read LCD display
- Suitable for medical and industrial environments
- Auto-power off
- 1000 hours continuous use
- Portable
- Built to last

Trade Approved

Regardless of whether you call it Class III Approved or Trade Approved, the DS-502 weighing scale is approved to the NAWI Directive.

This means that the DS-502 is suitable for use within a medical environment for weighing swabs and nappies. Yet also perfectly at home in a factory or warehouse providing Trade Approved weights.

Portable

Replaceable batteries provides at least 40 hours of continuous use, which offers you great flexibility and manoeuvrability for your staff.

Plus, the DS-502 is also compact and only weighs 1.5kg, so staff can quickly and conveniently transport the scale to anywhere that accurate weights are required, either in medical or industrial fields.

Splashproof housing

The DS-502 is suitable for application in a wide range of environments due to the IP65 rated housing which means that the scale can be regularly wiped down.

IP65 rating means that the scale is now only completely protected when it comes to dust particles, but the scale can also be wiped down regularly in order to keep hygienic, with no issue being caused to the scale.
