What is the JCE?

The Jadever JCE is an affordable counting scale for parts counting, sampling and check weighing. This portable counting scale comes with a full range of features.

The features include zero mode, pre-set tares, a full numeric keypad and built-in overload protection to ensure longevity of the device. It also has accumulation and auto power-off function.

Robust weighing

The JCE is built for regular weighing and counting of parts. Its durable shell and water resistant keypad make it perfect for many environments and for many uses.

The scale comes with three backlit LCD electronic displays which shows the weight readings brightly and clearly, making the JCE a suitable check weigher of choice for use in warehouses.

Choice of capacities

The JCE has a choice of capacities and graduations available to meet your needs. Capacities range from 3kg to 30kg and graduations from 1g.

The Tare function means that any unwanted weight, such as the weight of a container holding parts, can be quickly and easily removed for a highly accurate counting reading.
