Ideal for care homes

The Marsden M-600 is a hoist weighing attachment which is perfect to weigh immobile patients in care homes, hospitals and private residences.

Simple hook the M-600 to your existing hoist with a coat-hanger style attachments and you are ready to begin gaining accurate readings for your patients and residents. Simple and easy to use.

Optional connectivity options

The M-600 is available with either Bluetooth or Wi-Fi connectivity to ensure that our customers are able to transfer data seamlessly or input into EPR systems.

We would simply need to insert a connectivity module at the time of order and then provide you with our standard protocols for easy and simple integration into your existing system.

Easy to use

The M-600 features from our best-selling DP-3810 indicator. This device features from a full numeric keypad for easy BMI calculation and simple function keys.

When attaching the scale to the hoist, ensure the links are vertical and within a $\pm 5^\circ$ angle to obtain an accurate weight reading.

The On/Off button ensures that you have full control over the device and you can prolong the battery life. Hold enables you to gain readings for unsteady patients and Tare allows you to deduct unwanted weight.
