- Covered by the Marsden 8 year warranty

Why the M-925?

The M-925 is a wide weighing platform, designed to weigh patients in beds or on trolleys. The low profile platform has built-in ramps and a shallow incline.

This scale has proven to be incredibly popular within hospital wards as the scale can be positioned at an entryway, then as the beds are manoeuvred around the hospital, a weight can be obtained.

Optional connectivity options

The M-925 is available with either Bluetooth or Wi-Fi connectivity to ensure that our customers are able to transfer data seamlessly or input into EPR systems.

We would simply need to insert a connectivity module at the time of order and then provide you with our standard protocols for easy and simple integration into your existing system.

Easy to use

The M-925 features from our best-selling DP-3810 indicator. This device features from a full numeric keypad for easy BMI calculation and simple function keys.

The On/Off button ensures that you have full control over the device and you can prolong the battery life. Hold enables you to gain readings for unsteady patients and Tare allows you to deduct unwanted weight.
