- Auto power-off function helps to save battery power
- Simple and easy to use
- Closer to DEXA than any other body composition scales
- Easy to read display
- Hold and Tare functions to enable accurate and easy weighing
- Covered by the Marsden 4 year warranty

The readings

The Marsden MBF-6010 is a body composition weighing scale, which is ideal for use in hospitals, gyms, personal trainers and sports clubs.

Measures Basal Metabolic Rate, Total Body Water), Fat Free Mass, Fat Mass, Body Fat %, Muscle Mass, Protein Mass, Extracellular Water, Intracellular Water, Skeletal Muscle , Visceral Fat Area Level, Metabolic Age (AGEM), Weight and BMI

Closest to DEXA

This scale was used in a study by Hull/ York Medical School, who compared body composition scales and found that the MBF was closer to DEXA than any other.

DEXA is considered to the gold standard, when it comes to body composition analysers. So much so, that it is used by the medical profession and top athletes, to monitor themselves and ensure that they are in peak performance.

Easy to use

The MBF-6010 is a simple and easy to use body composition analyser. Thanks to the full numeric indicator and two displays, everything is easy to input and see.

When your patient steps onto this scale, a very safe and small electrical current passes through their body. Electrical current flows through water, fat and muscle mass at different speeds, and therefore the scale can calculate how a body is composed.

Capacity:	300kg	Power Supply:	Mains/Rechargeable
Graduations:	100g	Battery Life:	55 hours of continuous use
Functions:	Hold, Tare, BMI	Approvals:	Class III and MDD Approved
Dimensions:	450mm x 425mm x 1055mm	Optional Extras:	Carry Case
Weight of Scale:	9.5kg	Warranty Period:	4 Years
