- Detects signs of virus in seconds
- An alert will signal when higher than 37.8 °C

What is the T-100?

The T-100 is an MDD Approved digital infrared thermometer that makes taking a person's temperature incredibly simple and easy to use.

This is a handheld device which is ultra-lightweight and easily portable. Temperature readings can be provided in either °C or °F and it is accurate to 0.1°C to ensure that people are monitored closely and safely.

How to use the T-100?

Simply point the T-100 non-contact infrared thermometer at a person whose temperature you wish to take, and press the button on the handle.

Once a temperature has been registered on the device, it will show nice and clear on the display. If an individual's temperature is above 37.8 °C, the display will turn red and an alert will beep.

Where can it be used?

The primary function of the T-100 is to monitor the temperature of individuals. Place the thermometer 1 to 3cm away from the forehead and press the button.

The secondary function of the T-100 is to monitor the temperature of surfaces such as bath water, baby milk and alternative surfaces. Easy to toggle between by a simple button.
