What is the V-23?

The V-23 is a portable pet scale, which is lightweight and portable. The digital scale is perfect for keeping regular check on a pet's weight.

The scale features from Tare and Hold functions, and simply needs 4 x AAA batteries to power the device. Ideal for use in veterinary surgeries or for monitoring your pet at home.

Easy to clean

In order to help make the V-23 incredibly diverse and suitable for veterinary surgeries, we have designed the product to be wiped down.

Even though the device does not hold an IP rating, the platter can be wiped down without causing damage to the scale. Making it a clean and hygienic addition to any surgery.

Lightweight and portable

The V-23 has been designed with the ease of the user in mind. Whether it be within a veterinary surgery or at home, this is the ideal scale.

Weighing only 2.5kg, the scale is easy to transport around the veterinary surgery, from room to room. Or when used at home it is slimline enough to be stored in small and compact spaces.
